RFQ-0420 Request for Quotation: Pump station refurbishment (fictional sample)

Issued by Northfield Water Works, a fictional municipal utility.

Closing date for quotations: 15 December 2026. Currency: South African rand.

Quotations must be priced per unit and must follow the order of the schedule below.

Instructions to bidders

Bidders should read every clause of this document before preparing a quotation.

The site is a treatment works with restricted access; deliveries must be booked in advance.

Working hours on site are Monday to Friday, seven in the morning to four in the afternoon.

Safety induction is compulsory for every driver and every installer entering the works.

The utility will not accept responsibility for goods left unattended at the gate.

Offloading equipment is the responsibility of the supplier unless agreed otherwise in writing.

Every delivery must be accompanied by a delivery note that lists the goods by description.

Damaged or incomplete deliveries will be recorded and reported to the supplier on the day.

The supplier must replace faulty goods at its own cost and within a reasonable time.

Test certificates, where applicable, must be supplied with the goods and not after delivery.

Electrical equipment must comply with the applicable national wiring and safety standards.

Mechanical equipment must be supplied with the lubricants required for first operation.

Where an item is superseded, the bidder must offer the current equivalent and say so.

Alternative offers are welcome but must be priced separately from the compliant offer.

The utility keeps the right to inspect goods at the premises of the supplier before dispatch.

Confidential information received during this process must be kept confidential by all parties.

Bidders must not communicate with the staff of the utility about this request except as set out.

Conflicts of interest must be declared in writing together with the quotation.

The utility applies a preference scheme in line with its published procurement policy.

Currency fluctuations after the closing date are for the account of the supplier.

Schedule of items

Item CP-101 Centrifugal pump | qty 10 units | 316 stainless steel casing

Item CP-102 Submersible pump | qty 6 units | cast iron body, 7.5 kW

Item CP-103 Dosing pump | qty 4 units | PVC head, 0-20 l/h

Item VL-201 Gate valve DN50 | qty 40 units | ductile iron, flanged PN16

Item VL-202 Ball valve DN25 | qty 60 units | brass, threaded

Item VL-203 Check valve DN80 | qty 24 units | cast steel, flanged PN16

Item VL-204 Butterfly valve DN100 | qty 18 units | wafer type, EPDM seat

Item MT-301 Electric motor 5.5 kW | qty 8 units | IE3, 4 pole, IP55

Item MT-302 Electric motor 11 kW | qty 4 units | IE3, 4 pole, IP55

Item MT-310 Motor starter | qty 6 units | DOL, IP55 enclosure

Item SN-401 Level sensor | qty 14 units | ultrasonic, IP67

Item SN-402 Pressure transmitter | qty 12 units | 0-16 bar, 4-20 mA

Item SN-403 Flow meter DN50 | qty 5 units | electromagnetic, IP68

Item PG-601 Pressure gauge | qty 30 units | 0-10 bar, 100 mm dial

Item PG-612 Temperature gauge | qty 20 units | 0-120 C, bimetal

Item CB-501 Control cable 4 core | qty 500 m | 2.5 mm2, armoured

Item CB-503 Power cable 3 core | qty 300 m | 6 mm2, armoured

Item FL-701 Flange set DN50 | qty 36 units | carbon steel, PN16

Item FL-702 Flange set DN100 | qty 20 units | carbon steel, PN16

Item GK-801 Gasket kit DN50 | qty 50 units | graphite, spiral wound

Item TK-110 Storage tank 5 m3 | qty 2 units | HDPE, vertical

Item TK-120 Dosing tank 500 l | qty 3 units | HDPE, with bund

Item PN-130 Pipe DN50 PN16 | qty 120 lengths | HDPE, 6 m lengths

Item PN-140 Pipe DN100 PN16 | qty 80 lengths | HDPE, 6 m lengths

General conditions

Prices are fixed for the validity period stated in the quotation and exclude VAT.

Bidders must state clearly anything that is excluded from their price.

Delivery is to the Northfield depot unless the bidder states another point of delivery.

Goods must be new and unused and must carry the manufacturer warranty.

Deviations from the specification must be listed and explained in the quotation.

Quotations remain valid for sixty days from the closing date.

The utility may split the award between bidders by item.

Late quotations are returned unopened and are not considered.

Technical queries must be sent in writing before the closing date.

Samples may be requested before award and are returned at the bidder cost.

Payment is made thirty days after receipt of a correct invoice.

Bidders must hold valid tax and registration documents on request.

The utility is not bound to accept the lowest or any quotation.

Pricing for optional extras must be shown separately from the schedule.

All dimensions are nominal unless the specification says otherwise.

Packaging must protect the goods during transport and storage on site.

Spare parts lists and manuals must accompany the delivery of machines.

Any change to the schedule is issued as a written addendum to all bidders.

Queries and clarifications will be answered to all bidders at the same time.

Evaluation is by price and by compliance with the specification.

The successful bidder will receive a purchase order before delivery.

Cancellation of an order for late delivery is at the discretion of the utility.

Delivery periods start on the date of a written order and are stated in calendar weeks.

The supplier must keep the utility informed of any expected delay as soon as it is known.

Variations to quantities after award require a written instruction from the utility.

Invoices must show the order reference, the description and the quantity delivered.

Disputes will first be referred to the procurement officer named in the covering letter.

Any matter not covered here is governed by the general conditions of the utility.

This document is written for a fictional exercise and is not a real invitation to bid.

Names of places, companies and people in this document are invented for testing.

No real product, price or supplier is described by the figures in this document.

References to standards are illustrative and have no legal effect in this exercise.

The exercise tests software that reads documents and compares what suppliers offer.

A reader should be able to follow every line of this document without outside knowledge.

Clarification meetings, if held, will be recorded and minutes sent to every bidder.

Photographs and drawings, if supplied, form part of the description of the goods.

Where a drawing and the written description differ, the written description applies.

Bidders must price every line; a line left blank is read as not offered.

Prices for spare parts recommended for two years of operation may be shown at the end.

Training for operators, if offered, must be priced separately from the goods.

The utility reserves the right to withdraw this request at any time without liability.

This request is a fictional sample created for software testing only.
